

Main Features

- High-Fidelity Sound Design optimal for all DJs
- Snug fit for comfortable use
- Flexible protein leather ear pad surfaces
- Low-rebound urethane foam inside ear pads
- Magnesium alloy minimizes stress on head
- New I-Type hinge structure for functionality and design
- Swivel mechanism
- MONO/STEREO switch ensures monitoring even with single-ear monitoring

HDJ-2000

Removable Mini XLR connector

MONO/STEREO switch

FEATURES

1 High-Fidelity Sound Design Optimal For All DJs

High sound quality has been achieved with the driver unit featuring a diaphragm of optimal material and thickness, a voice coil for good balance from bass to treble, and a large, high flux magnet 2" in diameter. This enables clearly catching dance music beats (bass drums and cymbal rhythms) needed for DJ performances. Superior sound insulation makes it easy to cue up the next track, even in noisy clubs and discos. The insulating material inside the headphones was also carefully selected and ear pads provide a tight seal, contributing to clear reproduction of mid to high sound ranges with subtle nuances. These headphones are also suitable for professional use in studios.

2 Excellent Durability And Toughness For Demanding Professional Use

The durability of the headphone plug and connecting parts joining the main body and the cable has been improved, achieving construction robust enough to withstand professional use. The removable Mini XLR connector also makes it easy to replace the cable if it breaks. Furthermore, the urethane pads are wrapped in high quality leather, providing greater comfort and extended wear. The main structure of the headphones is crafted of magnesium alloy for light weight and durability, making them ideal for travel and long periods of use.

3 New I-Type Hinge Structure For Functionality And Design

With a new i-type hinge, a smooth and integral form has been achieved that naturally fits the hands at any moment during DJ play. The ear pads have a spun finish aluminum ring that matches the design of Pioneer CDJ player play/cue buttons, for a simple and stylish design.

4 Snug Fit For Comfortable Use Even In Long Sessions

The HDJ-2000 offers an excellent fit with various ingenious details for comfortable use even in long sessions.

- Flexible protein leather with a soft touch and natural feel is used for ear pad/head pad surfaces that touch the skin.
- Low-rebound urethane foam is used inside the ear pads and head pad. They nicely fit over the shape of the head, maintaining comfort with a snug fit even in long sessions.
- Magnesium alloy components are used for the main body for both light weight and durability. This minimizes stress on the head, ensuring comfortable DJ play.

5 Other Functions:

- Folding structure: It folds into a compact configuration for easy carrying.
- Swivel mechanism: The housing turns 90 degrees for more convenient single-ear, on-shoulder, and various other monitoring styles. It automatically goes back to the original position after it is swiveled.
- Click mechanism: It clicks into place to prevent inadvertent rotation or folding of the headphones during use.
- MONO/STEREO switch: Ensures monitoring even with single-ear monitoring.
- Carry pouch: It comes with a pouch for carrying.

SPECIFICATIONS

Type	Fully enclosed dynamic headphones
Frequency Range	5Hz - 30,000Hz
Impedance	36Ω
Maximum Input	3,500mW
Output Sound Level	107dB/mW

Unit Type	2" dome
Plug	1/8" 3P mini plug (gold-plated, screw-type)
Weight	10 ounces (excluding cord)
Accessories	1/4" 3P plug adapter (gold-plated, screw-type), and a carry pouch
Connection cord	4' long single coiled cable (about 10' when straight)
