

Must be used with a computer to operate. Laptop not included.

## Main Features

- Take anywhere with USB power and plug-and-play connectivity
- Sleek, stylish ergonomic design
- Included Virtual DJ LE software
- Compatible with Serato DJ Intro software
- High quality built-in audio interface
- Pulse Control provides visual prompts via various types of illuminations directly on the unit
- Personalized user interface for custom audio/video control with any MIDI compatible software

## FEATURES

### 1 Pulse Control

The integrated Pulse Control of the DDJ-ERGO provides users with visual prompts via various types of illuminations on its buttons and platters. The controller utilizes a new "Pure Platter" jog wheel that helps guide the user during performance with the movement of lights in accordance with the pitch, beat, and effects of the music as well as when a song is being loaded.

- **Mix Pulse** – The mix pulse mode shows the difference in pitch of songs currently playing through the light of the jog wheel. As the pitch of songs begin to match, the intensity of the light increases. In conjunction with the music, the pulse of lights increases beat matching skills.
- **Beat Pulse** – The embedded LEDs in the channel faders illuminate along with the beat of the current song playing. The illumination intensifies and weakens based on the output sound level.
- **Launch Pulse** – Triggers a red light to illuminate on the jog wheel to signify a press of the track load button.
- **FX Pulse** – The effect being applied to the currently playing song will be represented not only audibly but also via the light movements on the Jog wheel.

### 2 Laptop Dock Design

Like Pioneer's other DDJ controllers, the DDJ-ERGO is designed to accommodate the placement of a laptop computer below the unit to help save room and bring the screen closer to the user. The controller also features removable legs, enabling it be used in angled or horizontal positions.

### 3 MIDI Compatibility

The DDJ-ERGO is compatible with Musical Instrument Digital Interface (MIDI), allowing up to four-deck control and use of the controller's dedicated sampler button. The unit is compatible with various DJ software such as Native Instruments' TRAKTOR (not included).

### 4 USB Power

The DDJ-ERGO-v utilizes power from USB connections found on most computers, eliminating the need for an external power supply.

### 5 DJ Software

The DDJ-ERGO is compatible with Serato's "Serato DJ Intro" software and includes a copy of the "Virtual DJ Limited Edition" software by Atomix Productions that offers a broad range of functions for mixing songs, such as making loops, adding effects and creating samples, as well as the ability to mix up to 4-channels and even perform video playback.\*

Virtual DJ Limited Edition software

Serato DJ Intro software

### 6 High Quality Audio

The unit employs the same technology used in Pioneer's professional DJ equipment for clear, powerful audio output.

### 7 Additional Features Include:

- Employs a P-LOCK Fader Cap locking mechanism to prevent the channel fader knobs and crossfader knob from slipping.
- Built-in audio interface for high quality sound input and output.

\*Upgrade to Virtual DJ Pro software is required to output full-screen video.
